

DoggieJ's Diapers

DoggieJ's diapers are used to prevent male or female dogs from urinating in unwanted areas, such as on bedding material, carpets, pillows, blinds, furniture, etc. It can also be used as a device to prevent a male dog from impregnating a female or on a female dog during menstruation. DoggieJ's are very stylish and may be worn as clothing or used to keep dogs warm during cold weather.

DoggieJ's products are sold at the following locations:

- Pet Discount Stores
- True Friends (Ala Moana Shopping Cntr)
- Marina Pet Supply
- Crazy Canine

DoggieJ's Diapers

DoggieJ's are a custom fit dog diaper that prevents dogs from urinating anywhere except within the confines of the diaper. It is made from non-allergenic material (primarily cotton) and has an inner lining to prevent leakage onto the outside of the diaper. The diaper is stabilized with two elastic straps, which affix around the rear legs and a Velcro strap is used to secure the diaper to the dog's waist. The diaper may be used with reusable or disposable pads, that are used to absorb the urine. We recommend women's sanitary pads or **Poise Pads** which can be purchased at any retail store. The washable pads are also made

from a non-allergenic cotton absorbent material, that is secured to the diaper by Velcro tabs.

How to Use the Product

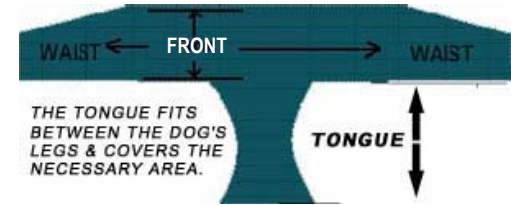

Secure a pad onto the diaper by using the disposable pad with self-adhering tape or the Velcro tab on the washable pad. The pad should be placed front-to-back for female dog or side-to-side for males. Powder can be applied to the pad to prevent skin irritation. Once the pad is secured, place the back legs through the elastic loops on the rear of the diaper and raise the diaper until contacting the dog's abdomen. Overlap the two Velcro flaps around the top of the dog, interlocking firmly around the dog's waist. The diaper should fit snugly but not too tight, otherwise this could cause the animal discomfort. The diaper should be removed from the dog on a regular basis to prevent skin irritation.

Unique Functions of the Diaper:

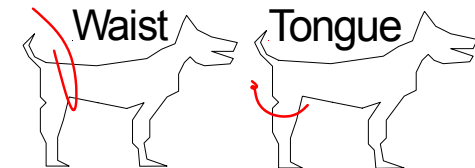

1. The diaper can be easily removed from the dog's waist.
2. The diaper doesn't hinder the dog from moving his bowels outside the confines of the diaper.
3. The diaper will also serve older dogs that suffer from incontinence.

Larger sizes are available on our web site!

See our web site for diaper measurements, and customized sizes!

SIZE	FRONT	TONGUE	WAIST
	(Male)	(Female)	
Xsmall	2 3/4"	3 3/4"	06 to 10 inches
